

UNECE

Online seminar organized by

UNECE Real Estate Market Advisory Group (REM)

Technology for urban planning: the case of “Cypeurban”

9 December 2021, Thursday (online) from 4- 5.45 p.m. CET

In English only

About the seminar

The seminar explains a case study of the digitalization of urban planning to improve land management, gain transparency and improve access to information. The seminar will include a presentation of a tool to grant urban licences by digitally checking proposed urban planning projects in order to improve project assessment accuracy and agility of the urban planning process. The tool, called “CYPEURBAN”, is an innovative software to manage validation of licences for urban planning projects. It allows to check and provide a more effective public administration supervision of the preparation of urban planning documentation requested by private and public sector organizations.

Draft programme
